PROFILE

Information Technology graduate currently working at Sea Bird Medicare as a **Digital Marketing Designer & Web Designer**. Alongside website and design work, I contribute to healthcare software products through requirement analysis, workflow design, business rules, functional testing, and AI-assisted implementation.

PROFESSIONAL EXPERIENCE

SEA BIRD MEDICARE JUL 2025 - PRESENT | MUMBAI

Digital Marketing Designer & Web Designer

- Design and manage company websites and digital content, including page layouts, responsiveness, and visual assets using Figma and Canva.
- Contribute to healthcare software products by understanding requirements and defining how features, workflows, and business rules should work.
- Use ChatGPT, Claude, and Emergent AI to support implementation, troubleshooting, and feature improvements.
- Perform functional testing, identify issues and edge cases, and use GitHub and VS Code as part of development workflows.

KEY PRODUCTS & PROJECTS AT SEA BIRD MEDICARE

Corporate Healthcare TPA Platform

Ongoing healthcare product

- Work on employee onboarding, company medical packages, clinic and slot selection, appointment booking, rescheduling, cancellations, reports, and notifications.
- Define scenarios for individual diagnostic tests, mental health and nutrition consultations, personal payments, and clinic compatibility.
- Test workflows across employee, company, clinic, operations, admin, and billing journeys.

MedVerifys

Live maritime medical verification platform

- Work on candidate registration, clinic reports, doctor review, medical status decisions, retesting, billing, and reporting workflows.
- Support requirement refinement, functional testing, AI-assisted implementation, issue resolution, and production verification.

MedVerify Services Website

Company website

- Design and develop website pages focused on layout, responsiveness, content presentation, and user experience using Figma, Canva, AI-assisted tools, and GitHub.
